A new Regional Multi-Disciplinary Assessment Framework for understanding and meeting the needs of vulnerable children in Northern Ireland is being introduced in Craigavon and Banbridge / Southern Trust on 1<sup>st</sup> April 2007. This assessment framework is known as UNOCINI and will be used by disciplines / agencies to make referrals to Social Services and for subsequent assessment of children's needs.

In preparation for the introduction of UNOCINI, these three seminars will provide an opportunity for all staff who provide services to parents and children that may identify and refer children in need, to familiarise themselves with this new multi-disciplinary referral and assessment tool.
